

As a **Certified Distributor of OpenSciEd**,
Activate Learning delivers the best
 full-service implementation support for teachers.

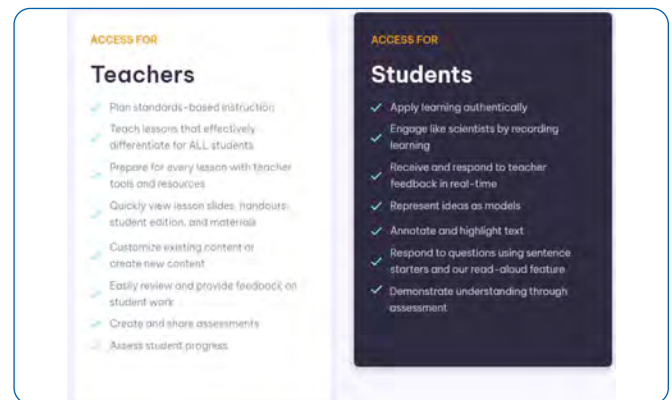

Standards-Aligned Middle School Science Curriculum

- Meets Next Generation Science Standards (NGSS) of Three Dimensional Learning
- Phenomena-based science curriculum developed based on research on how students learn with educator input and in-classroom testing
- Students explore driving questions, conduct investigations, collect and analyze data, develop and use models to explain phenomena

Innovative, Interactive Digital Edition for Teachers and Students

- With the Activate Learning Digital Platform (ALDP) students benefit from an interactive, engaging online experience when using the OpenSciEd curriculum.
- Students can record their observations and reasoning, and receive feedback from teachers.
- The platform is designed for accessibility and inclusion and offers embedded translation for 130+ languages, text-to-speech with read-along highlighting, and sentence starters to support writing.

Providing Support for Teachers

- Certified OpenSciEd Professional Learning Workshops for Educators, Instructional Supports, Webinars and Lesson Modeling
- Dedicated Customer Success resources for a smooth implementation

Certified OpenSciEd Science Kit Materials

- Providing all materials necessary for investigations for OpenSciEd units
- Materials are packaged into lesson bags and a QR code driven app allows easy access to materials when teachers need them

 and OpenSciEd!

OpenSciEd Curriculum Overview

Across the three years of middle school, students conduct sequenced activities, investigations, readings, discussions, and lessons that build student understanding of core disciplinary ideas, crosscutting concepts, and multiple scientific practices.

Below is an example unit sequence, however, all units can be adapted to fit your state's sequence.

Grade 6

Grade 7

Grade 8

OpenSciEd and Activate Learning share the same "pedagogical-DNA", having both been research based, investigation centered, and designed using the same NGSS standards and principals.

Activate Learning takes great pride in offering the most comprehensive version of OpenSciEd available on the market today. Our team is dedicated to staying true to the original curriculum and keeping current with ongoing updates to our digital version.

The Activate Learning Digital Platform enables teachers to easily navigate through their course material while providing engaging activities for their students as they learn.
